

APPLICATION OF PREVENTION AND INFECTION CONTROL PROCEDURES IN A SAFE MANNER IN THE CONTEXT OF A PANDEMIC

Training for CISSS de Laval Interns

BEFORE BEGINNING INTERNSHIP - PREPARATION

It is mandatory for everyone to view the following videos and read the following procedures BEFORE starting an internship. Click on the [Internet Link](#) to access the videos and procedures:

For all interns and medical residents:

- Video: [Putting on and removing personal protective equipment \(PPE\) for airborne contact + precautions](#)
- Video: [Putting on and removing personal protective equipment \(PPE\) for airborne contact + and droplet contact + precautions](#)
- Video: [Procedure for eye protection disinfection in a pandemic](#)
- Video: [New COVID-19 policies for personal protective equipment \(PPE\) - CIUSSS Centre Ouest-de-l'Île:](#)
- [Procedure for droplet/contact PPE](#)
- [Procedure for airborne/contact PPE](#)
- [Procedure for eye protection disinfection](#)
- [Procedure Operation of a COVID-19 hot zone unit](#)
- [Procedure: IPC measures at the entrance of the personnel of l'Hôpital Cité-de-la-Santé](#)

For interns and medical residents who will be going to hot zones where the wearing of the N95 is required (intensive care, emergency, care units with severity criteria):

- Video: [Reuse of N95 Single-Use Filtering Facepiece Respirators](#)
- [Procedure for Reuse of N95](#)

For interns and medical residents who will be going to the following departments/units: Operating block, MEF (mother-child), hemodialysis:

- Read the procedures specific to certain environments on [web page](#)

FIRST DAY OF INTERNSHIP – TRAINING

All interns and medical residents must participate in training on the safe and appropriate use of PPE. The training lasts 30 to 40 minutes and is given by a PPE coach.

DURING THE INTERNSHIP – SUPERVISION AND COACHING

During the internship, interns and medical residents will have access to supervision and coaching regarding the safe PPE application procedures by PPE coaches who are present in the multiple departments. Coaches assure the right PPE application and support every individual in that matter. The internship supervisors will also assure a safe application of PPE.

INTERN AND MEDICAL RESIDENT COMMITMENT

To ensure their safety and that of others, all interns and medical residents agree to view the videos, read the procedures, participate actively in training, commit to supervision and coaching guidelines, and apply PPE procedures in a safe manner.

Thank you for your collaboration.
